ZETR

ELECTRICAL_REDEFINED

ZETR is a range of refined and integrated power outlets, switches and electrical fixtures that provide minimal impact on architectural finishes.

Our products are designed to disappear. Whether this is through a flush aesthetic, or using shapes and forms that visually trick the eye. Our designs are refined and resolved, a quiet and simplified detail in any space.

ZETR has designed two mounting assemblies that allow for a simple flush installation of your outlet or switch grid.

The ZETR Fixed Mounting Assembly (13-FMA) has a set front depth for simple flush installation in plasterboard locations.
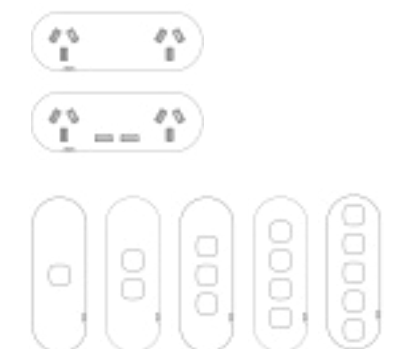

The ZETR Adjustable Mounting Assembly (13-AMA) has a movable inner ring and allen key fastening system which allows the outer edge of the ring to finish flush in varying wall types, thicknesses and surfaces.

ZETR_move brings our signature minimal and refined electrical fixtures to furniture and travel applications as a completely flush double poled power solution.

This allows designers the ability to bring a quiet power detail into confined moveable locations such as furniture, office pods and booths, mobile homes, using our existing 13-AMA and 13-FMA mounting assemblies.

ZETR_carbon is a selection of carefully curated metal power outlet and switch faceplates for the 13_series range. The ZETR_carbon range empowers designers with the ability to customise.

All ZETR_carbon plates are designed and hand crafted in Australia, using high quality materials and machinery. We provide sourcing, design, and fabrication services for custom switch and power outlet faceplates and button covers in a variety of metal finishes including patina and polished brass, bronze, stainless steel and matte black steel.

Using either the Z_clip (12-ZC) or
R_bracket (12-RB) the electrical
fixture is surface mounted to the wall
with no precise cut out, no additional
onsite trades, minimising installation
times whilst delivering a
premium finish.
